German native, English fluent, French fluent, Portuguese basic

International Financial Integration and Output Co-Movement. An emerging strand of the literature presents first indications that financial integration not only enhances risk sharing but also facilitates contagion to the real economy. This paper puts this emerging literature to a new level by systematically testing the effects of cross-border portfolio investment and bank loan holdings on output co-movement in a panel covering 31 economies from 2001-16. Employing a simultaneous equation framework, I combine traditional trade-gravity instruments with a new instrumental variable for financial integration. I exploit the fact that different communities of countries are integrated to different degrees. Overall, I find that portfolio and bank loan holdings have led to more and less output co-movement, respectively. Signs of portfolio investment integration effects differ for stock and bond holdings, and bond maturity. Greater output co-movement mostly stems from long-term bond holdings. I also investigate how these channels affected output co-movement during the global financial turmoil of 2008. The results suggest that greater bond and bank loan integration fed into greater co-movement prior to the crisis and reversed when country-level financial fragility was high. The stock market channel did not smooth this development.

Policy papers

Financial Market Fragmentation in the Euro Area: State of Play, joint with Henrik Enderlein. Briefing paper for the Committee on Economic and Monetary Affairs of the European Parliament for the Monetary Dialogue of September 2016.

L'internationalisation des centres de décision en Europe : une analyse comparée, with Aurélien Eyquem. Focus 014-2016. Conseil d'Analyse Economique, July 2016.

Les centres de décision d'entreprises étrangères en France : une analyse comparée, with Farid Toubal and Aurélien Eyquem. Focus 013-2016. Conseil d'Analyse Economique, June 2016.

L'assurance-chômage aux Etats-Unis : un système à deux niveaux, Focus 011-2016. Conseil d'Analyse Economique, April 2016.
